

GSMA Inclusive Tech Lab

Mobile Money Programme

Bart-Jan Pors
Director of Inclusive Fintech

June 2019

Mobile for Development

58 million lives impacted to date

We drive innovation in digital technology to reduce inequalities in our world

Our Mission

***“Drive innovation
through research, development and testing of new
technologies, and establishing impactful proof of concepts
with the aim to increase financial inclusion of the
underserved”***

Concept: GSMA Inclusive Tech Lab is a central workshop, where the mobile money industry can collaborate on the industry's key challenges and opportunities

With **dedicated technical staff**, the Lab will be able to take a **hands-on approach** to strategize, develop, test, and pilot **technological solutions** directly with mobile money providers, providing the mobile money industry **readily usable products and insights**.

Ideation

Exploration

Industry Pilot

Dissemination

Services: The Lab will focus on three activities: Research, pilot projects, and providing test environments

Technology-focused Research

Testing and validation of existing and upcoming technologies and standards

Innovation Projects

Define, ideate, prototype, test, and share technology solutions

Support up to proof-of-concept / launch of solution

Test Environments

Host test environments of technical assets (i.e. Mojaloop)

Provide the industry with a sandbox in which to develop and test

Output: delivering tangible value for the industry by disseminating knowledge and solutions to the wider ecosystem

MATERIALS

Blogs
Videos
Publications
Webinars

OUTREACH

Workshops
Hackathons
Conferences
Open-houses

ASSETS

Web portals for developers
and testers of the Lab's
technology assets

Looking ahead: potential topics of technological interest

Interoperability

E.g. Mojaloop, Mowali

Seamless services integration

E.g. Mobile Money API

Towards apps and usability

E.g. USSD to app, IVR/disabled user groups

Merchant payments

E.g. QR codes

Digital identity

E.g. device fingerprinting

...Open to industry requests!
